Introduction

Welcome to the Harrell's Hardy Plants website.

We are a small nursery growing plants, mainly perennials, on a small scale. However the plants we sell are not small as we don't send out our plants as plugs, most are in 0.5L (11cm) pots, some bigger and rarely, some smaller.

Our plant list isn't the whole story as we have other plants, some we are building up stocks of, others stock plants either in the nursery garden or in pots. Yet others that have been added throughout the year, this is especially true of our hemerocallis range.

If there is a hardy perennial you want but can't find, do e-mail us - we may possibly have it!

All the photographs that illustrate this plant list are taken at the nursery or in our own gardens.

All our plants grow in ordinary garden soils in sun/part shade unless otherwise stated and most can be seen growing in the nursery garden

COVID 19

At present there is uncertainty about when or if any of our external plant sales will take place. We will update this page when we know more.

After lockdown is eased the nursery will be open by appointment for plant sales. Our entire sales area is outdoors.

MAIL ORDER

We are now mainly using carriers for our mail order service as they appear to us to offer prompt and reliable service at a reasonable price. We will give individual quotes for p&p for each order rather than a blanket cost, thus ensuring that you pay only for the plants you order. Although the prices given in our plant list are correct for spring delivery, by summer the plants may be larger or potted on so please check when ordering that the plant you want is still available at the spring price.

PLANT LIST 2021

ACHILLEA

- ptarmica "The Pearl" 30" tall white flowers with grey/green foliage. **4:00**

- filipendulina 3 foot x 3 foot tall strong stems and golden yellow flowers. **4:00**

AGAPANTHUS

-Harrell's hybrids a mix of seeds from the many varieties we have grown over the years. Various heights and shades of blue. 2 year + plants in large pots **10:00**

ALCHEMILLA

- alpina 3"- 5" tall 10"- 20" wide. Tiny yellowy green flowers. **3:00**

-vetteri 6"-8" tall much smaller version of the above, doesn't seed around like mollis but is equally attractive. **3:00**

ARMORACIA

-rusticana variegata 3-foot tall large leaves with stunning cream variegation **5:00**

ARUNCUS

dioicus "Kneffii" 36" tall with creamy white flowers in loose panicles, ferny foliage. Full or part shade. **5:00**

-dioicus var. kamtschaticus 3ft tall creamy-white flower plumes, will tolerate most soils and aspects. From RHS seed. **5:00**

ARTEMISIA

-vulgaris "Oriental Limelight" 2-3ft tall. Soft filigree green-yellow variegated foliage small cream flowers. Sun **3:50**

BERGENIA

-cordifolia "Tubby Andrews" 12"- 14" tall, variegated leaves of cream pink and green with pink flowers which bloom 2 or 3 times during the season.. Stunning in winter when colouring is even more intense. Part sun / part shade. **5:00**

CAMPANULA

-"Paul Furze" 12" to 16" tall, an unusual late flowering campanula with hairy inky green leaves and pale blue flowers from August through autumn. **4:00**

- persicifolia 20"- 30" tall blue or white bell-shaped flowers in early summer. **4:00**

-poscharskyana 4"- 6 "x 36" blue flowers, any position. Flowers all summer and even in a mild winter.**3:00**

CENTAUREA

-montana "Parham" 15" tall with purple/blue flowers, this cornflower will bloom from June to September if deadheaded. Sun **4:50**

CHAEROPHYLLUM

-hirsutum "Roseum" 20 "- 30" tall this lovely umbellifer is known as the pink cow parsley. It has a base of feathery leaves with stems topped with flat heads of tiny pinky mauve flowers. We find it does best in part shade.**4:50**

CICHOBIUM

-intybus 4 foot tall spikes of palest china- blue daisy-like flowers from a basal rosette. One of the most popular plants we sell as its not commonly available .**5:00**

DIASCIA

-personata self-supporting upright stems 36"tall with pretty pinky/salmon flowers all summer.**4:00**

DIERAMA

- pulcherrimum Our plants come from our own, open-pollinated seeds and therefore could be any colour from purple/ pink to white. Sun. Price dependent on size, **4:50 to 6:00**

EPILOBIUM

-augustifolium var. album, the white rose-bay willow herb. This beautiful plant has 4-5 foot spires of pure white flowers with fresh green foliage from mid- summer onwards. Makes a lovely cut flower.**4:50**

-"Stahl Rose" this is the pale pink version of the above and sells out when the plants in the garden are in flower. Both do in sun or part shade. **4:50**

ERIGERON

- karvinskianus "Profusion" 8"- 12" tall, tiny white flowers fading to pink. Flowers over a long period and fully hardy, it seeds itself gently around and can be used in pots or borders . **3:00**

ERYNGIUM

-bourgatii "Graham Stuart Thomas selection" 18" x 18". Very blue flower heads set off by grey and white variegated foliage, the blue colouring extends down the stems as the plant ages. Usually 9cm pots as we never have enough of this plant for sale. Photographed in the nursery garden. Sun **4:00**

FILIPENDULA

-rubra "Venusta" 6 foot x 4 foot this deep rose pink fluffy flower headed plant will grow happily in most soils including boggy. Photographed in the bog garden at the nursery **AGM 5:00**

-ulmaria 36" tall with ferny foliage and creamy-white flowers in early to mid summer.**4:00**

-ulmaria flore plena 4-5 foot tall with clump-forming bright green ferny foliage with small double creamy white flowers. Very useful for damp soil and waterside. Part shade **4:50**

GAURA

- lindheimeri 4 foot tall, this see-through plant has thin stems clothed with narrow foliage and topped with pink buds which open to white flowers. Said to be tender but we have had this planted in the garden for several years .We treat it as a penstemon, not cutting it back until mid to late April. Sun **4:50**

GERANIUM

- himalayense 12" - 18"tall. Large mauve flowers with small white-eye early summer and then will re-flower if cut back for late summer. **4:00**

- macrorrhizum "Snowsprite" 12"-15" tall. Smaller than the species with white flowers and pale green calyces. **4:00**

GEUM

-"Blazing Sunset" 18" tall stems hold double brick red flowers, some of the largest of the Geum family, all summer long **4:00**

-"Emory Quinn" a new Geum with large golden yellow single and semi-double flowers on red stems above low ruffled foliage. 14" -16" tall with a long flowering season.**4:00**

-"Lemon Drops" 12" tall this lovely Geum has nodding pale lemon bell shaped flowers. A seedling discovered by Beth Chatto **4:00**

-"Marmalade" 12" – 16" tall single soft orange flowers held on stems above a basal rosette of soft foliage. **4:00**

-rivale 8" - 12" tall reddish pink flowers attractive seed-heads. **3:50**

-"Savanna Sunset" 12" - 16" tall , brown/red stems and buds open to frilled semi-double dusky apricot flowers. **4:00**

HELENIUM

"Bressingham Gold" 6 foot tall (we have seen this in a sheltered spot up to 9 foot!) Lovely butter-yellow flowers. **4:50**

-"Rubinzweg" 3 foot tall reflexed dark red petals with yellow and brown centre. **AGM 4:50**

HELIANTHUS

-"Gullick's Variety" 6 foot tall with golden yellow semi double flowers. Makes a robust clump. **AGM 4:50**

HEMEROCALLIS

Our range of these lovely and undemanding hardy perennials continues to grow and we currently have 100+ for sale, some in quite limited quantities .Plants raised by us are in bold. All plants at least two fans unless otherwise stated. Over the last few years we have been fortunate to be given some seeds from an American enthusiast's breeding programme and have been growing these plants on in the stock beds. We hope to have some plants from these seeds for sale later this year. We will post photographs of them on our blog as they flower.

-recta "Sulphurea" 16"-20" tall. Pale lemon yellow cup-shaped flowers almost continually throughout the summer. Very pretty. **3:50**

-recta warrenii 2 foot tall stems bearing bright canary-yellow cup-shaped flowers over a long period. A more vivid version of sulphurea. **4:00**

-x tonguei 12" tall , a slightly spreading habit with trailing stems of apricot flowers with a bright red eye. Needs full sun and a free draining soil. AGM **4:00**

RANUNCULUS

acris citrinus 2-3 ft tall flower spikes of pale lemon buttercup flowers over a long period. **4:00**

-ficaria "Brazen Hussy" 3" - 6" tall, nearly black foliage, yellow flowers. **2:50**

-ficaria single cream 3"-6" tall,

-ficaria viridiflora 3" tall double flowers of green with a hint of lemon. **2:50**

All the ficarias die down around middle to end of May and reappear in January/ February depending on the weather

RUDBECKIA

- fulgida "Goldsturm" 2 foot x 2 foot. Golden yellow flowers with brown centres, long flowering. **AGM 4:00**

SALVIA

- "Ribambelle" 24" - 28" tall with bright coral-pink flowers which have a white throat. Needs full sun and a well-drained soil. Hardy to -10 degrees . **4:00**

- verticillata "Hanney's Blue" 2-21/2 ft tall with whorls of violet-blue flowers in darker violet calyces and stems. Full sun. **4:00**

-x jamensis "Red Velvet" 2 foot tall with striking red flowers. Needs cold greenhouse winter protection.. Full sun **4:00**

SANGUISORBA

- canadensis 5 foot tall, a clump forming plant with spires of white fluffy flowers. Most soils. Sun/part shade. **5:00**

- obtusa 24"x 24" from mid or late summer to early autumn bears small fluffy rich pink flowers in short nodding bottle-brush like spikes. **4:50**

- "Pink Tanna" 24" tall willowy spikes with soft pink bottle-brush flowers mid-summer. **4:00**

SAPONARIA

-officinalis rosea plena 18" - 24" tall very pretty double pale pink fragrant flowers from early summer to autumn. **3:50**

SELINUM

-carvifolium 16" – 20" tall, a lovely umbellifer with fine ferny foliage and 3" domed white flower heads. Attractive to bees and hover flies. **4:00**

SESELI

-hippomaranthrum 12"-16" tall. A lovely umbellifer despite the name! It has umbels of dark pink flowers and a lax habit. **4:00**

SILPHIUM

-perfoliata 6 to 7 foot plants with daisy-like lemon yellow flowers & fresh green foliage. A magnet for pollinators **5:00**

SOLIDAGO

_rugosa "Fireworks" 3 ft to 4 ft tall, dark stems holding long slender branches of yellow flowers. Loved by bees. **4:50**

- "Golden Baby" 12"- 18" tall. Yellow flowers, a smaller version of the more usually seen plant. **3:50**

-sempervirens 3ft- 5ft tall this native of north-eastern USA is rarely offered in this country which is a puzzle as its narrow dark green leaves are ever-green and the flower heads of deep yellow are a magnet for bees. Also it is better behaved than the UK version in that it doesn't seed itself about! **4:50**

TELLIMA

- grandiflora 32" x 12" spires of greenish white fragrant flowers for a shady spot but will tolerate some sun if soil is moisture retentive. **4:00**

-grandiflora "Forest Frost" as above but with silvery leaves with red tints in the winter and the greenish white flowers have pinkish-red rims. Same growing conditions. **4:50**

TRIFOLIUM

-ocroleucon 2 foot tall. Now becoming more widely available we have grown this plant and "rubens" for many years . A compact plant with slightly hairy grey/green foliage, its flowers are huge fat cream clover flowers each one about 2" tall. **4:50**

-rubens 2 foot to 3 foot tall, rubens has smooth green foliage & smaller dark pink clover flowers , both this & ocroleucon are loved by bees. **4:50**

VALERIANA

- phu "Aurea" 14"- 18" tall the beautiful bright yellow foliage makes a pool of colour in the spring then fading to green in the summer. White flowers. **4:00**

-pyrenaica 3 foot tall bushy plant with lightly scented pale lilac-pink flowers and heart-shaped leaves. Flowers early summer. Semi shade **5:00**

VERBENA

-bonariensis 5-6 foot tall. Elegant slim plant with deep violet flowers, the ultimate "see through" plant! A magnet for insects. **AGM 3:50**

-officinalis "Bampton" 2 foot tall. Violet purple clusters of tiny flowers are borne all summer on tough thin stems of a lovely dark metallic purple making this plant stunning in or out of flower. Full sun.

4:00

VERONICA

-gentianoides 10"- 16" tall-spreads slowly. In late spring to early summer sends up stems of palest blue flowers. Sun or light shade.**3:50**

-kiusiana 2 foot tall with sky-blue flowers, full sun or semi-shade. **4:00**

VERONICASTRUM

-virginicum f. roseum up to 5 foot tall flower stems topped with pale pink flowers **5:00**

GRASSES

ACORUS

-grammineus variegata 8" - 10" tall will grow in soil or water. **3:50**

-grammineus "Ogon" 8" - 10" tall, will grow in soil or water. Lovely soft yellow foliage.**3:50**

BRIZA

-media 2 foot x 2 foot (Lesser Quaking grass) blue green leaves, purple tinted green spikelets which dance in the slightest wind and turn straw coloured when ripe. **3:50**

CAREX

-siderosticha variegata 12" x 12" white variegation to bright green leaves. Dies down completely in winter and is quite late emerging.**3:50**

ERAGROSTIS

-curvula (Weeping Love grass) 2 - 4 foot tall dark green leaves, beautiful drooping panicles of dark olive green. A lovely plant. **4:00**

HAKONECHLOA

-macra "Aureola" 16" x 16" soft and flowing golden yellow grass. Absolutely fabulous in the shade.

AGM 5:00

LUZULA

-sylvatica 12" x 12" green leaves with brown seed-heads. Will grow in sun or shade. **3:50**

-sylvatica "Aurea" 12" x 12" lovely golden yellow leaves with the same easy-going nature as the other members of the sedge family. **3:50**

MILIUM

-effusum "Aureum" known by all as "Bowles Golden Grass" 18" x 18" Bright golden leaves if grown in semi or full shade. **3:50**

MISCANTHUS

-sinensis "Morning Light" 3 - 4 foot tall. Delicate silver variegated leaves with upright habit. Beautiful especially when placed where it catches the sun. **5:00**

MOLINIA

-caerulea subsp arundinacea "Transparent" 6 foot tall this variety of the purple moor grass is the ultimate "see through" grass. It has delicate seed heads which start green & progress to purple in summer with the whole plant turning golden yellow towards winter. Sun **4:50**

PANICUM

-virgatum (Switch Grass) 3-4 foot tall upright green leaves with weeping panicles, the whole plant turns yellow in autumn and light brown in winter **4:50**

-virgatum "Shenandoah" 3-4 foot tall bluish leaves tipped with violet/purple which extends to the whole plant in autumn **5:00**

PHALARIS

-arundinacea 30" x 30" White striped grass with beige seed-heads which are good for drying.**3:50**

SESLERIA

-caerulea "Malvern Mop" 6"-8" tall with bluish green leaves makes a dense clump. The panicles are little pom-poms on the tips of short stems late spring/early summer. **3:50**

STIPA

-arundinacea "Pheasant grass" 2 foot tall bronze leaves with large airy seed-heads. The whole plant taking on coppery bronze tones in autumn. **4:00**

-tenuissima 2 - 3 foot tall this grass has hair-fine foliage topped with fluffy plumes which fade to beige by the end of summer. It is the ultimate mobile grass the plumes moving gracefully with the slightest breeze. Beautiful. **4:00**
